CarbonMarkets ASIA

Following successful editions in Singapore and Hong Kong, the **5th Annual Carbon Markets Asia** will take place in Kuala Lumpur to enable greater accessibility for project hosts and industry representatives from Asia's 3rd largest CDM project base. **Carbon Markets Asia** will continue to bring together leading international players to examine barriers and opportunities which abound this dominant market.

Asia has become increasingly active in the Clean Development Mechanism and has earned its place as the global leader in generating CDM credits. The Chinese and Indian dominance of the market is well documented but other countries in Asia are fast emerging as key players in the region's carbon markets. Significant investment is being made to generate Certified Emission Reduction credits in waste treatment, palm, cement and other sectors in countries such as Malaysia, the Philippines and Indonesia. What progress has been made and how can Asia realize its full potential?

Carbon Markets Asia is an integral event in **Green Power's Carbon Markets Global Series**, an annual calendar of events which provide an excellent platform for stakeholders to learn and do business, driving growth in developing markets.

Feedback from delegates at Green Power Conferences previous Carbon Markets events:

“ There are few conferences which make me stay and listen to the panels throughout the days. Yours counted among them ” CLIMATE FOCUS

“ I was able to spend some valuable time with some good people, as well as learn a few things I didn't know. My benchmarks of success ” OREGON CARBON ALLOCATION TASK FORCE

“ Turn out was very strong, I thought, and the program was great ” RENEWABLE CHOICE

“ I really liked the opportunities for networking, which is my primary reason for attending ” EVOLUTION MARKETS

CarbonMarkets GLOBALSERIES

The **Carbon Markets Global Series** offers an excellent platform for CDM project hosts, carbon credit buyers, government representatives, DNA's and carbon experts to learn, network and do business in strategic regional hubs. The series is firmly focused on attracting new project hosts and expanding the global carbon markets.
